

Aayush Karki

Full Stack Software Engineer

 ayushkarkee6@gmail.com  +9779827368746  Kathmandu, Nepal  linkedin.com

 github.com  Portfolio Website

Professional Summary

Full Stack Software Engineer with 2+ years of experience building scalable healthcare and SaaS applications using React, Next.js, Node.js, Express.js, GraphQL, PostgreSQL, and Prisma ORM. Experienced in designing secure backend systems while delivering modern, responsive frontend applications.

Strong background in API design, database architecture, authentication, production monitoring with Datadog, performance optimization, and cloud-based deployments. Experienced in technical leadership through code reviews, mentoring developers, architecture discussions, and delivering end-to-end features from planning to production.

Skills

Languages

- JavaScript
- TypeScript

Backend

- Apollo GraphQL Server
- Rest APIs
- Cron Jobs / Scheduled Tasks
- Event-Driven Architecture
- WebSockets (Socket.io )
- Authentication & Authorization
- File Uploads
- Payment Gateway Integration (Khalti, Stripe)

Cloud & DevOps

- Datadog Monitors
- Datadog Dashboards
- Log Analysis
- Root Cause Analysis
- Performance Optimization

Frontend

- React.js
- Next.js
- Zustand
- TanStack Query (React Query)
- Tailwind CSS
- Shadcn UI
- HTML5
- CSS3

Databases

- PostgreSQL
- MySQL
- MongoDB
- Prisma ORM
- Redis

Tools

- Git
- GitHub
- Postman
- Newman
- Jira
- VS Code

Professional Experience

Caredevi, *Engineering Manager*

July 2025 – present
Remote

- Architected and developed scalable backend services powering healthcare workflows including EMR, patient portals, wellness features, and public profile systems.
- Built and maintained GraphQL and REST APIs using Node.js, Express.js, Apollo Server, PostgreSQL, and Prisma ORM.
- Designed and optimized database schemas, improving query performance and maintaining scalable data models.
- Developed secure authentication and authorization using JWT, Firebase Admin SDK, and OAuth-based workflows.
- Implemented production monitoring, dashboards, and alerting using Datadog to improve observability and accelerate issue detection.
- Investigated production incidents through logs, metrics, and traces, performing root cause analysis and delivering long-term fixes.
- Optimized backend performance by improving Prisma queries, middleware, and API execution, reducing response times for critical endpoints.
- Built scheduled jobs, background workers, and event-driven processes supporting healthcare and wellness features.
- Collaborated with frontend engineers to design scalable APIs and deliver end-to-end product features.
- Led code reviews, mentored developers, conducted knowledge-sharing sessions, and contributed to engineering standards and architecture discussions.

Going Genius group of companies , *Full-Stack Developer*

November 2024 –
July 2025
Kathmandu, Nepal

- Designed and developed a full-stack POS platform using Next.js, Node.js, Prisma ORM, and PostgreSQL.
- Integrated Khalti Payment Gateway for secure wallet top-ups and payment processing.
- Built reusable UI components and responsive interfaces improving maintainability.
- Led a team of interns through code reviews, technical guidance, and feature planning.
- Improved application performance by optimizing database queries and frontend rendering.

Projects

HomeServiceBooking , *Freelance Project*

March 2025 – April 2025

Tech Stack: Vite, React.js, Tailwind CSS, Express.js, Node.js, Prisma, MySQL, Shadcn UI, TypeScript, Stripe, OpenStreetMap, Socket.io

- Built a full-stack service marketplace with role-based dashboards for customers, recruiters, and administrators.
- Implemented Stripe payments, OpenStreetMap integration, and Socket.io  real-time messaging.

- Designed scalable backend APIs with Prisma ORM and MySQL.
- Developed analytics dashboards for bookings, users, and revenue.

GlowGuide , *Freelance Project*

March 2025 – April 2025

Tech Stack: Vite + React js, Tailwind CSS, Express js, Node js, Prisma ORM, My Sql, Shadcn Ui, TypeScript, Hugging Face API, Socket.io

- AI-powered skincare recommendations
- Hugging Face integration
- Real-time chat
- Appointment management
- Notification system

Meeting Scheduler , *NextJs - Intern Project*

January 2025 –
March 2025

Tech Stack: Next.js, Prisma, NeonDB, Clerk, Google Api

- Built a full-stack app for scheduling meetings with secure auth via Clerk and data handling through Prisma + NeonDB.
- Integrated Google Calendar API to auto-schedule events and generate Google Meet links.
- Created user dashboards to manage profiles, event types, and shared booking links.
- Delivered a responsive, real-time experience with optimized UI and backend performance.

Achievements

Engineering Highlights

- Led backend development of healthcare platform features serving production users.
- Implemented Datadog monitoring and production alerting to improve system reliability.
- Mentored junior developers through code reviews and knowledge transfer sessions.
- Designed scalable GraphQL APIs and database architecture for multiple production features.
- Delivered end-to-end full-stack features from planning to deployment.

Education

BSc (Hons) Computing, *Itahari International College*

2021 – 2024
Itahari, Nepal
